LEARN MORE...

AFTER SCHOOL CLASSES

Kids Corner: Learn about radio through art, music and storytelling during this fun interactive class. Students create our monthly family radio hour "Kids Corner" featuring poetry, recipe ideas, art projects, storytime and other projects.

Intro to Podcasting: Students will create original podcasts to air on KDNK. They will develop skills in creative brainstorming, script writing, interviewing, sound byte collection, and basic audio editing.

Storytelling for Radio: Creative writing and broadcasting collide in the world of immersive radio theater. Aspiring young storytellers will weave vocal performance, sound effects and music to bring their fictional world to life. We will build skills in script writing, audio editing, and voice acting to create unique radio stories.

WEEKEND WORKSHOPS

Make a Zine!: Join us for a weekend of making your very own unique zines! These small, self-published booklets are a great way to showcase your creativity and unique interests. You can make a zine about anything: politics, local music, culture, pets, pasta shapes, renaissance art...

History of Music Media & Make a Mixtape: Learn the history of physical music media through hands-on exploration of vinyl, CDs, cassettes, and more! Students will explore the massive KDNK music library and each craft and record a personalized mixtape (yes, on a real, actual cassette!)

Live DJing: Join DJs Jeeradoe S. and Da Walrus for a hands-on introduction to the building blocks of live DJing. Learn how to build and sequence a crowd-pleasing playlist, blend tracks, apply effects, and put together a set with its own unique flow and energy. Whether you're into hip-hop, EDM, rock, pop, funk, or anything in between, all styles and genres are welcome.
